This is the construction of "The Old Place" which took place between 1911 & 1912. It is built in a draw giving protection from storms and better insulation. Elic Wilson acquired the home in 1960 and made major renovations.

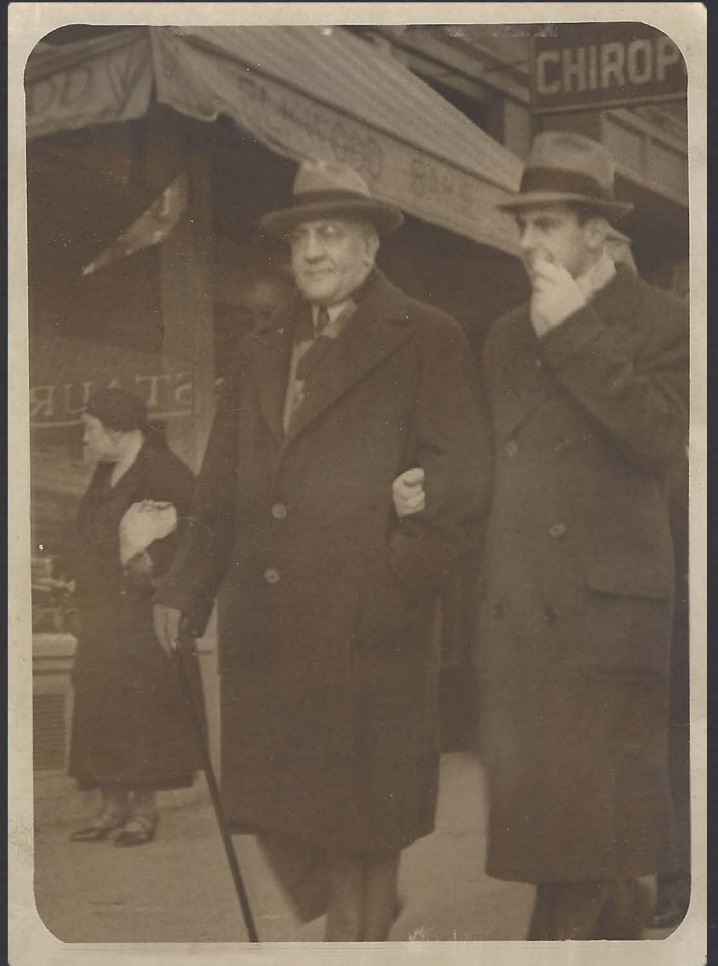

The original Correll home at 510 Colgate. The family lived here while the brick home was built next door at 506 Colgate. This home remained until the new home was sold in the 90's. It was then demolished and a new yard put in.

The Correll home at 506 Colgate completed in 1928. This is a "True" brick home constructed of two layers of brick. Notice the original front stairs with steps on either side. It was suggested they were changed because in this configuration rain water was channeled directly to the front basement windows.
